Private Drawing Lessons Advanced Lesson Supply List- Updated March 7, 2019

You should have some of these supplies already if you've taken my 6 Lesson introductory drawing course. To show you examples of all the materials I've included links to the items on the Blick site, but don't feel compelled to buy from there. I've included some other vendor websites at the end of the document.

Buy the Nitram Fusains charcoal. Nitram is the best charcoal I've found to draw with. If you absolutely can't find Nitram, let me know.

We will begin working on your Stathmore drawing paper, but as you progress you will switch to higher quality white and toned paper.

If you have trouble finding any of the supplies, please contact me.
